- Extension Pole (if requested)

Child Safety

This product has no cord control or chain and is safe for use around young children!

1 Installation Brackets

**Installing inside the window frame…**
- At top of window frame, measure 75mm in from each end and mark with a pencil, this is the centre of the outer brackets.
- Place brackets in position flush with the front of the window opening and mark where the screws will go.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the brackets into position using 2 long screws for each bracket into the first two holes closest to the front of the bracket.
- If more brackets are supplied, space them evenly between the first two brackets.

**Installing outside the window frame…**
- Measure 75mm in from top left and top right of where the blind will sit (normally edge of architrave) and mark where the screws will go.
- We recommend using a spirit level to align brackets if not installing on the architrave.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the brackets into position using 2 long screws for each bracket.
- If more brackets are supplied, space them evenly between the first two brackets.

2 Attach Handle

- Attach the handle to the bottom rail as per diagram.
- Attach the handle to the middle rail as per diagram.

3 Install Blind

- Position the top front lip of the blind under the top front lip of the brackets.
- Push the blind up at the back to click into position as per diagram to the right.

Great Job… Enjoy your new Veneta Blinds!
How to operate and maintain your Cordless Honeycomb Blind Models

Operating your Blind

- **Bottom Up**
  - Lower and raise the blind using the handle on the bottom rail
  - TDUBU, Day&Night
  - Lower and raise the blind using the handles on the bottom and middle rails.
  - **Note:** You must first lower the bottom rail before lowering the middle rail.
  - **Note:** You must first raise the middle rail before raising the bottom rail.

Maintaining your Blind

1. **Removing your blind**
   - Position a flat head screw driver between the back of the headrail and bracket.
   - Push screw driver upwards.
   - Pull back of headrail down to unclip bracket from headrail.
   - Repeat for all other brackets.

2. **Dusting**
   - Dust can be removed using a feather duster or vacuum with brush attachment on low suction.

3. **Spot Cleaning**
   - Use a warm damp cloth or a mild detergent for tougher stains.
   - Dab the affected area, but do not rub the fabric. Finish with just a warm damp cloth.
   - Allow the fabric to dry in the lowered position.

4. **Ultrasonic**
   - If ultrasonically cleaning the blind please specify that a mild solution must be used.
   - **Note:** The rails should never be immersed in liquid.
