How to install your
Motorised Honeycomb Blind Models (240 Volt)
#65101-11752-E

Required Tools

- measuring tape
- drill with 2mm bit
- phillips bit or screwdriver
- pencil
- knife

Included Hardware

The hardware can be found in the end of every box.

- Installation Bracket
- 240 Volt Wall Plug
- 15mm Screw
- 31mm Screw
- 50mm Screw
- Wall Plugs for Brick or Cement using a 6mm bit (If requested)
- CR2540 Battery (Supplied Separately)

1. Installation Brackets

_Installing inside the window frame…_
- At top of window frame, measure 40mm in from each end and mark with a pencil (30mm for blind width less than 610mm); this is the centre of the outer brackets.
- Place brackets in position 2mm back from the front of the window opening and mark where the screws will go.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the brackets into position using 2 long screws for each bracket into the first two holes closest to the front of the bracket.
- If more brackets are supplied, space them evenly between the first two brackets.

_Installing outside the window frame…_
- Measure 40mm (30mm for blind width less than 610mm) in from top left and top right of where the blind will sit (normally edge of architrave) and mark where the screws will go; this is the centre of the outer brackets.
- We recommend using a spirit level to align brackets if not installing on the architrave.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the brackets into position using two 31mm installation screws for each bracket.
- If more brackets are supplied, space them evenly between the first two brackets.

2. Install Blind

- Position the top front lip of the blind under the top front lip of the brackets.
- Push the blind up at the back to click into position as per diagram to the right.
How to install, operate and maintain your
Motorised Honeycomb Blind Models (240 Volt)

**3 Remote Control Holder**
- Optional Wall Remote Holder: Install two 15mm screws approximately 82mm apart and leave them protruding approx. 3.5mm from the wall. Attach the wall holder and lightly tighten screws as required.
- Install the CR2450 battery into the back of the remote control, by sliding the cover downwards.
- Note: The remote is pre-programmed to the blind and will work straight out of the box. To change the settings, see page 3.

**Great Job… Enjoy your new Veneta Blinds!**

**1 Removing your blind**
- Position a flat head screw driver between the back of the headrail and bracket.
- Push screw driver upwards
- Pull back of headrail down to unclip bracket from headrail.
- Repeat for all other brackets.

**2 Dusting**
- Dust can be removed using a feather duster or vacuum with brush attachment on low suction.

**3 Spot Cleaning**
- Use a warm damp cloth or a mild detergent for tougher stains.
- Dab the affected area, but do not rub the fabric. Finish with just a warm damp cloth.
- Allow the fabric to dry in the lowered position.

**4 Ultrasonic**
- If ultrasonically cleaning the blind please specify that a mild solution must be used.
- Note the rails should never be immersed in liquid.
Connecting the remote to the blinds:

1. Install the CR2450 battery into the back of the remote control, by sliding the cover downwards and leave the cover off the remote.
2. Connect the 240 volt wall plug to the blind (wait for blind to move up and down slightly).
3. On front of Remote select relevant channel.

On back of Remote, in the battery compartment…

4. Press the left P2 button (wait for blind to move up and down slightly).
5. Press the left P2 button (wait for blind to move up and down slightly).
6. Press the Up (^) button (wait for blind to move up and down slightly).
7. Press the Stop (-) button (wait for blind to move up and down slightly).
8. Your Remote is now connected to the blind.

Setting the upper and lower limits:

1. Connect the 240 volt wall plug to the blind (wait for blind to move up and down slightly).
2. On front of Remote select relevant channel.

On back of Remote, in the battery compartment…

3. Press the left P2 button (wait for blind to move up and down slightly).
4. Press the Up (^) button (wait for blind to move up and down slightly).
5. Press the left P2 button (wait for blind to move up and down slightly).
6. Press the Up (^) button and wait for the blind to rise to the desired upper limit.
7. Press the Stop (-) button, the blind will stop.
8. Press the Stop (-) button 6 times (wait for blind to move up and down slightly).
9. Press the DOWN button and wait for the blind to lower to the desired upper limit.
10. Press the Stop (-) button 6 times (wait for blind to move up and down slightly). Upper and Lower limits are now set.

The remote is pre-programmed to the blinds and will work straight out of the box.

**IMPORTANT**

Ensure the 240 volt wall plug has been disconnected from the blind for 30 seconds.
Programming mode will stop if nothing is pressed for more than 10 seconds.
Hold remote battery in place firmly to ensure the display remains on during programming.

If the programming does not work or you press a button out of sequence, unplug the 240 volt wall plug from the blind for 30 seconds, then re-connect and try programming again.
