How to install your
Smartfit Honeycomb Blind (25mm Cell)
#65101-10235-G

Required Tools
- measuring tape
- drill with 2mm bit
- phillips bit or screwdriver
- pencil
- knife

Included Hardware
The hardware can be found in the end of every box.

1 Installation Brackets

Installing inside the window frame...
- At top and bottom of window frame measure at least 12mm in from each end and 13mm back from front of window frame and mark where the screws will go.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the Shoe Bases into position using 1 long screw for each Shoe ensuring the outer edge is to the outside of the window.

Installing outside the window frame...
- We recommend using a spirit level for vertical and horizontal alignment.
- Place the blind in position and mark the top corners of the blind.
- Measure 4mm down and 5mm in from the top corners and mark the location of the L bracket outer screws (ensure screws are at least 16mm from window opening).
- The measurement from this screw to the screw on the bottom brackets is the ‘order height’ minus 8mm (order height can be found on the outside of your box). And mark with a pencil.
- Place L brackets in position and mark where the other screws will go.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the L brackets into position using 2 long screws for each bracket.
- Fix the Shoe Bases onto the L Brackets using 1 short bolt for each shoe, ensuring the outer edge is to the outside of the window.

2 Support Brackets
(only for blinds over 1270mm)

Installing inside the window frame...
- Mark the centre of the window opening at top and bottom and mark 13mm back from front of window frame.
- Measure 9mm to the left and 9mm to the right of the centre mark, this is the position of the screws for the centre Shoe Bases.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Place Shoe Bases into position ensuring the outer edges meet in the centre.
- Fix the Shoe Bases into position using 1 long screw for each Shoe.

Installing outside the window frame...
- Mark the centre of the window opening at the top and bottom of the window frame.
- Measure 5mm to the left and 10mm to the right of the centre mark, this is the position of the inner screws for the centre L brackets.
- Place L brackets in position and mark where the outer screws will go.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the L brackets into position using 2 long screws for each bracket.
- Fix the Shoe Bases onto the L Brackets using 1 short bolt for each shoe ensuring the outer edges of Shoes meet in the centre.
- Slide bracket covers over the bracket screws.

Note: 2 shoes provided for top only, as per diagram.
How to install, operate and maintain your
Smartfit Honeycomb Blind (25mm Cell)

Installation continued...

3 Attach Handle
- Slide handle onto the top and bottom rails.

4 Install Blind
- Please note all blind cords are interconnected.
- Ensure the cords are not crossed or tangled.
- Place Shoe Sliders into centre of Shoe Bases and slide towards the outer edge of Shoe as per diagram to the right.

Great Job… Enjoy your new Veneta Blinds!

Operating your Blind
- Lower and raise the blind using the handles on the top and bottom rails.
- Note the blind will close firmly at the top utilising the inbuilt magnets.

Maintaining your Blind

1 Dusting
- Dust can be removed using a feather duster or vacuum with brush attachment on low suction.

2 Spot Cleaning
- Use a warm damp cloth or a mild detergent for tougher stains.
- Dab the affected area, but do not rub the fabric. Finish with just a warm damp cloth.
- Allow the fabric to dry in the lowered position.

3 Ultrasonic
- If ultrasonically cleaning the blind please specify that a mild solution must be used.
- Note the rails should never be immersed in liquid.
