How to install your
Smartfit Honeycomb Blind (45mm Cell)
#65101-10236-G

Included Hardware

The hardware can be found in the end of every box.

- Shoe Base (For Headrail and Bottom Rail)
- Shoe Slider (Attached to blind)
- Installation L Bracket (Outside Install)
- Magnet Catch (for larger blinds)
- Handle
- Short Bolt
- Short, Medium & Long Screws for Wood
- Wall Plugs for Brick or Cement using a 6mm bit (if requested)
- Extension Pole (if requested)

Required Tools

- Measuring tape
- Drill with 2mm bit
- Phillips bit or screwdriver
- Pencil
- Knife

Installation Brackets

1. Installing inside the window frame...
   - At top and bottom of window frame measure 12mm in from each end and 23mm back from the front of window frame and mark where the screws will go.
   - We recommend drilling pilot holes for the screws using a 2mm bit.
   - Fix the Shoe Bases into position using 1 medium screw for each Shoe ensuring the outer edge is to the outside of the window.

2. Installing outside the window frame...
   - We recommend using a spirit level for vertical and horizontal alignment.
   - Place the blind in position and mark the top corners of the blind.
   - Measure 16mm down and 9mm in from the top corners and mark the location of the L Bracket bottom screws (ensure screws are at least 16mm from window opening).
   - The measurement from this screw to the top screw on the bottom brackets is the 'order height' minus 32mm (order height can be found on the outside of your box). And mark with a pencil.
   - Place L Brackets in position and mark where the other screws will go.
   - We recommend drilling pilot holes for the screws using a 2mm bit.
   - Fix the L Brackets into position using 2 long screws for each bracket.
   - Fix the Shoe Bases onto the L Brackets using 1 Short Bolt for each shoe, ensuring the outer edge is to the outside of the window.

Install Magnet Catches (if supplied)

- On the top of the blind (top rail) note the measurements from the left of blind to each magnet.

1. Installing inside the window frame...
   - At the top of the window frame measure from the left of Shoe Base and mark the same measurements on window frame. Place magnet catch in position and mark the screw hole with a pencil.
   - We recommend drilling pilot holes for the screws using a 2mm bit.
   - Fix the magnet catches into position using 1 short screw per catch.

2. Installing outside the window frame (not available for 62mm Cell)...
   - At the top of the architrave (or where blind will be positioned) measure from the left of Shoe Base and mark the same measurements on the architrave. Position the L Bracket to line up with the magnets at the top of the blind and mark the screw holes with a pencil.
   - We recommend drilling pilot holes for the screws using a 2mm bit.
   - Fix the L Brackets into position using 2 long screws per bracket.
How to install, operate and maintain your
Smartfit Honeycomb Blind (45mm Cell)

Installation continued…

3 Attach Handle
- Slide handle onto the top and bottom rails.

4 Install Blind
- Please note all blind cords are interconnected.
- Ensure the cords are not crossed or tangled.
- Place Shoe Sliders into centre of Shoe Bases and slide towards the outer edge of Shoe as per diagram to the right.

Great Job… Enjoy your new Veneta Blinds!

Operating your Blind

- Lower and raise the blind using the handles on the top and bottom rails.
- Note the blind will close firmly at the top utilising the inbuilt magnets.

Maintaining your Blind

1 Dusting
- Dust can be removed using a feather duster or vacuum with brush attachment on low suction.

2 Spot Cleaning
- Use a warm damp cloth or a mild detergent for tougher stains.
- Dab the affected area, but do not rub the fabric. Finish with just a warm damp cloth.
- Allow the fabric to dry in the lowered position.

3 Ultrasonic
- If ultrasonically cleaning the blind please specify that a mild solution must be used.
- Note the rails should never be immersed in liquid.
