Pin Side
Installation Bracket

Motor Side
Installation Bracket

Battery Clip

Screws for Wood,
Metal or Wall
Plugs

Wall Plugs for
Brick or Cement
using a 6mm bit

1 Installation Brackets

Installing inside the window frame...

- Take note to position brackets away from window handles and other obstructions allowing the blind to operate freely. Often the bracket will be flush with the front of window frame.
- Slide bracket covers onto brackets, if not already done.
- Position Motor Side bracket inside window frame at the top corner and mark where the 2 screws will go.
- Take note of the measurement from bracket to the front of window frame.
- Position Pin Side bracket inside window frame at the opposite top corner, at the same measurement to the front of window frame and mark where the screws will go.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the brackets into position using 2 screws for each bracket.

Installing outside the window frame...

- Position the Motor Side bracket at the top corner of where the blind will sit and mark where the 2 screws will go (often edge of architrave).
- Position the Pin Side bracket at the opposite top corner of where the blind will sit and mark where the 2 screws will go.
- We recommend using a spirit level to align brackets if not on architrave.
- We recommend drilling pilot holes for the screws using a 2mm bit.
- Fix the brackets into position using 2 screws for each bracket.

Feedback?

We would love to know how you went with your installation...

2 Install Blind

- With the blind still rolled up...
- Slip the Motor end of blind into the Motor Side bracket.
- Slide the other end of blind into the Pin Side bracket, and the spring loaded pin will click into place.

Installation continued...

3 Install Battery Tube

- With the blind still rolled up...
- Attach the battery clips to the window frame: Position the battery clips evenly along the battery tube, facing the window and within reach of the motor cord using one 25mm screw for each clip.
- Clip the battery tube to the battery clips.
- Optional: place the rubber rings onto the battery tube for a tighter fit inside
- Connect the battery tube to the motor of the blind.

Operating your Blind

- To operate your new Motorised Roller blind, press briefly the UP or DOWN button
- To stop the shade, press the MY button.

Extra Remote Settings

The Upper and Lower limits of the blind have been programmed, however the limits can be changed.

1 Recording My Position

- My Position lets you program a preferred position of your blinds so that you can access that favourite position every time.
- To set the MY Position, move the shade to the desired position with the UP and DOWN buttons then press the MY button until the shade jogs.
- To delete the MY Position, press the MY button to move to this position and press the MY button until the shade jogs.
- To move the shade to the MY position, briefly press the MY button.

2 Changing the Upper and Lower Limits

Changing the UP Limit

- Press the UP button to move the shade to the limit to be readjusted.
- Press and hold the UP and DOWN buttons simultaneously until the shade jogs.
- Press and hold the UP or DOWN button to move the shade to the new desired position.
- To confirm the new limit press and hold the MY button until the shade jogs.

Changing the DOWN Limit

- Press the DOWN button to move the shade to the limit to be readjusted.
- Press and hold the UP and DOWN buttons simultaneously until the shade jogs.
- Press and hold the UP or DOWN button to move the shade to the new desired position.
- To confirm the new limit press and hold the MY button until the shade jogs.

Maintaining your Blind

1 Dusting

- Dust can be removed using a feather duster or vacuum with brush attachment on low suction.

2 Spot Cleaning

- Use a warm damp cloth or a mild detergent for tougher stains.
- Dab the affected area, but do not rub the fabric. Finish with just a warm damp cloth.
- Allow the fabric to dry in the lowered position.
